

Tiny Size and Low Height MHz range crystal unit: Product Name: FA1210AN

Features

- Package size: 1.2 x 1.0 mm, t = 0.3 mm Max.
- Frequency range : 32 MHz to 100 MHz
(Currently avail: 32 MHz, 48 MHz)
- Frequency tolerance : $\pm 10 \times 10^{-6}$ (@+25 °C)
- Frequency vs. temperature characteristics:
 - : $\pm 10 \times 10^{-6}$ (-20 °C to +75 °C)
 - : $\pm 15 \times 10^{-6}$ (-30 °C to +85 °C)
 - : $\pm 20 \times 10^{-6}$ (-40 °C to +85 °C)
- ESR: 100 Ω Max. (32 MHz)
60 Ω Max. (48 MHz)

Applications

- Wearables, Smart speakers, Digital health
- Smartphone, Tablets, PCs
- General Consumer Electronics/Appliances
- Industrial IoT, Meter, Light/Building monitoring
- Enables wireless communication:
 - BLE, BT, NFC, Zigbee, Wi-Fi, etc.
 - LoRa, NB-IoT, SigFox, etc.

Description

FA1210AN is tiny size and low height, enabling designers to save board space without compromising performance. This is essential for devices and modules pushing the limit on features and size.

The wide MHz range frequency serves the popular wireless communication protocols, ideal for consumer and industrial IoT applications.

Outline Drawing

Internal connection
(TOP VIEW)

| Pin | Connection |
|-----|------------|
| #1 | X'tal |
| #2 | GND |
| #3 | X'tal |
| #4 | GND |

Typical Performance

Frequency vs. Temperature characteristics
(Frequency = 32 MHz, n=10)

[1] Product Number / Product Name

(1-1) Product Number

X1E000411xxxx26 (Please contact Epson for details)

(1-2) Product Name (Standard Form)

FA1210AN 32.000000MHz 12.0 +10.0-10.0

a b c d

a: Model b: Frequency c: Load capacitance(pF) d: Frequency tolerance($\times 10^{-6}$, +25 °C)

In addition to the mentioned above specification items("a" to "d"),

and please specify the frequency vs. temperature characteristics (one of "e" to "g" specification below).

e: $\pm 10 \times 10^{-6}$ / -20 °C to +75 °C, f: $\pm 15 \times 10^{-6}$ / -30 °C to +85 °C, g: $\pm 20 \times 10^{-6}$ / -40 °C to +85 °C

[2] Absolute Maximum Ratings

| Item | Symbol | Rating value | | | Unit | Note |
|---------------------------|--------|--------------|------|------|------|--|
| | | Min. | Typ. | Max. | | |
| Storage temperature range | T_stg | -40 | - | +125 | °C | Satisfy environmental characteristics specifications |

[3] Operating Conditions

| Item | Symbol | Rating value | | | Unit | Note |
|-----------------------------|--------|--------------|------|---------------|---------|---|
| | | Min. | Typ. | Max. | | |
| Operating temperature range | T_use | -40 | - | +85 (+105) | °C | Please contact Epson about T_use > +85 °C |
| Level of drive | DL | 0.01 | 10 | 100 | μ W | Recommended:10 μ W |

[4] Static Characteristics

| Item | Symbol | Specifications | | | Unit | Conditions / Remarks |
|---|----------------|-----------------------------|------|----------|------------------|---|
| | | Min. | Typ. | Max. | | |
| Nominal frequency range | f_nom | 32 | - | 100 | MHz | Please contact Epson about available frequencies |
| | | 32, 48 | | | | Currently avail frequency |
| Frequency tolerance | f_tol | -10.0 | - | +10.0 | $\times 10^{-6}$ | +25 °C \pm 3 °C DL = 10 μ W Does not include frequency aging |
| Motional resistance (ESR) | R ₁ | 100 (32 MHz) 60 (48 MHz) | | | Ω Max. | π circuit IEC 60444-2 T_use = Operating temperature range DL = 10 μ W |
| Shunt capacitance | C ₀ | - | - | 1.0 | pF | π circuit and Network Analyzer |
| Frequency vs. temperature characteristics | f_tem | Table 1. | | | $\times 10^{-6}$ | Reference at +25 °C \pm 3 °C |
| Load capacitance | CL | 6 | - | ∞ | pF | Please specify |
| Isolation resistance | IR | 500 | - | - | M Ω | |
| Frequency aging | f_age | ± 1 (32 MHz, 48 MHz) | | | $\times 10^{-6}$ | +25°C, First year |

Table 1. Frequency vs. temperature characteristics

| Operating temperature range | Frequency temperature characteristics |
|-----------------------------|---------------------------------------|
| -20 °C to +75 °C | $\pm 10 \times 10^{-6}$ |
| -30 °C to +85 °C | $\pm 15 \times 10^{-6}$ |
| -40 °C to +85 °C | $\pm 20 \times 10^{-6}$ |

Please contact Epson for other than the above

[5] Example of frequency vs. temperature characteristics

(5-1) 32.000 MHz

n = 10

[6] Marking Description

Table 1. Month of manufacture

| Month | Jan | Feb | Mar | Apr | May | Jun | Jul | Aug | Sep | Oct | Nov | Dec |
|-------|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|
| Code | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | X | Y | Z |

[7] Outline Drawing and Recommended Footprint

Unit: mm

| Pin | Connection |
|-----|------------|
| #1 | X'tal |
| #2 | GND |
| #3 | X'tal |
| #4 | GND |

Reference weight Typ. : 1.0 mg

Terminal coating : Au plating

[8] Moisture Sensivity Level and Electro-Static Discharge Ratings

(8-1)Moisture Sensivity Level (MSL)

| Parameter | Specification | Conditions |
|-----------|---------------|------------------|
| MSL | LEVEL 1 | JEDEC J-STD-020E |

[9] Reflow Profile

JEDEC J-STD-020E

Temperature [°C]

[10] Packing Information

(10-1) Packing Quantity

The last two digits of the Product Number (X1E000411xxxxxx) defines the packing quantity.
The standard is "26" for a 6 000 pcs/Reel.

(10-2) Taping Specification

Subject to EIA-481, IEC-60286 and JIS C0806

(1) Tape Dimensions

Carrier Tape Material : PS (Polystyrene)

Top Tape Material : PET (Polyethylene Terephthalate) +PE (Polyethylene)

(2) Reel Dimensions

Center Material : PS (Polystyrene)

Reel Material : PS (Polystyrene)

[11] Handling Precautions

Prior to using this product, please carefully read the section entitled "Precautions" on our Web site (<https://www5.epsondevice.com/en/information/#precaution>) for instructions on how to handle and use the product properly to ensure optimal performance of the product in your equipment.

Before using the product under any conditions other than those specified therein, please consult with Epson to verify and confirm that the performance of the product will not be negatively affected by use under such conditions.

In addition to the foregoing precautions, in order to avoid degrading the performance of the product, we strongly advise that you adhere to the below recommendations:

1. Limit reflow to 3 times.
This product has gone through AuSn melt sealing.
Reflow mounting is recommended instead of using a soldering iron or air heater.
When the product is removed from a PCB board or module with a soldering iron, please do so carefully as excess heat to the AuSn sealing material (melt point +278 °C) may deteriorate the seal and hermeticity.
2. Avoid using the products if it received any excessive shocks and vibrations
Crystal products may be damaged under some conditions during mounting if exposed to excess shock.
Please set the mounting conditions to a slow mounting speed on the PCB to minimize shock as much as possible.
Please review the conditions after the changed are made.
3. Keep the electrode wiring as short as possible to ensure normal oscillation.
4. Store the crystal products at normal temperature (+15 °C to +35 °C) and humidity (25 %RH to 85 %RH)
Storing the crystal products under higher temperature or high humidity over one year may affect frequency stability or solderability.
Contact Epson before use if the product has been stored outside the conditions mentioned above.
5. Ultrasonic equipment used for cleaning or bonding may deteriorate the characteristics of the product.
Be sure to check in advance.
6. In high humidity environment, dew condensation on the PCB board may cause malfunction such frequency shift or no oscillation.
7. Applying excessive drive level to the crystal units may cause deterioration of characteristics or damage.
Design and test the circuit so that the proper drive level is maintained.
8. The characteristic such as frequency, etc. may differ from your measurement depending on the measurement method or conditions.
Contact Epson for any questions.
9. In order to avoid malfunction by other signal lines, design pattern other signal lines away from the product.
and in case of multi-layered PCB board, do not lay out other signal lines under.
If shielding with GND is required, shield the surface farthest from the oscillation circuits.
10. Use soldering paste <80 μm Max, the products are low profile specification.
11. Ensure adequate negative resistance is allocated in the oscillation circuit,
otherwise oscillation startup time may increase or no oscillation may occur.
In order to avoid this, provide enough negative resistance that is 5 to 10 time the motional resistance(R1)
12. Aging specifications are estimated from environmental reliability tests and expected frequency variation over time.
They do not provide a guarantee of aging over the product lifecycle.
13. Should any customer use the product in any manner contrary to the precautions and/or advice herein,
such use shall be done at the customer's own risk.

< Check of Negative resistance >

- 1) Insert a pure resistance r in series with the X'tal.
- 2) Adjust r and find the maximum r value that starts oscillation.
- 3) Check the value of r in the oscillation state of 2).
Negative resistance of the circuit $|-R| =$
 $r +$ Series resistance value $R1$ of the X'tal
- 4) Negative resistance $|-R|$ guideline:
 $|-R| > R1$ Max. $\times 5$ to 10

PROMOTION OF ENVIRONMENTAL MANAGEMENT SYSTEM CONFORMING TO INTERNATIONAL STANDARDS

At Seiko Epson, all environmental initiatives operate under the Plan-Do-Check-Action (PDCA) cycle designed to achieve continuous improvements. The environmental management system (EMS) operates under the ISO 14001 environmental management standard.

All of our major manufacturing and non-manufacturing sites, in Japan and overseas, completed the acquisition of ISO 14001 certification.

ISO 14000 is an international standard for environmental management that was established by the International Standards Organization in 1996 against the background of growing concern regarding global warming, destruction of the ozone layer, and global deforestation.

WORKING FOR HIGH QUALITY

In order to provide high quality and reliable products and services than meet customer needs, Seiko Epson made early efforts towards obtaining ISO9000 series certification and has acquired ISO9001 for all business establishments in Japan and abroad. We have also acquired IATF 16949 certification that is requested strongly by major manufacturers as standard.

IATF 16949 is the international standard that added the sector-specific supplemental requirements for automotive industry based on ISO9001.

■ Explanation of marks used in this datasheet

| | |
|---|---|
|  | <p>● Pb free.</p> |
|  | <p>● Complies with EU RoHS directive. *About the products without the Pb-free mark. Contains Pb in products exempted by EU RoHS directive (Contains Pb in sealing glass, high melting temperature type solder or other)</p> |

- The content of this document is subject to change without notice. Before purchasing or using Epson products, please contact with sales representative of Seiko Epson Corporation ("Epson") for the latest information and be always sure to check the latest information published on Epson's official web sites and resources.
- This document may not be copied, reproduced, or used for any other purposes, in whole or in part, without Epson's prior consent.
- Information provided in this document including, but not limited to application circuits, programs and usage, is for reference purpose only. Epson makes no guarantees against any infringements or damages to any third parties' intellectual property rights or any other rights resulting from the information. This document does not grant you any licenses, any intellectual property rights or any other rights with respect to Epson products owned by Epson or any third parties.
- Using Epson products, you shall be responsible for safe design in your products; that is, your hardware, software, and/or systems shall be designed enough to prevent any critical harm or damages to life, health or property, even if any malfunction or failure might be caused by Epson products. In designing your products with Epson products, please be sure to check and comply with the latest information regarding Epson products (including, but not limited to this document, specifications, data sheets, manuals, and Epson's web site). Using technical contents such as product data, graphic and chart, and technical information, including programs, algorithms and application circuit examples under this document, you shall evaluate your products thoroughly both in stand-alone basis and within your overall systems. You shall be solely responsible for deciding whether to adopt/use Epson products with your products.
- Epson has prepared this document carefully to be accurate and dependable, but Epson does not guarantee that the information is always accurate and complete. Epson assumes no responsibility for any damages you incurred due to any misinformation in this document.
- No dismantling, analysis, reverse engineering, modification, alteration, adaptation, reproduction, etc., of Epson products is allowed.
- Epson products have been designed, developed and manufactured to be used in general electronic applications and specifically requires particular quality or extremely high reliability in order to refrain from causing any malfunction or failure leading to critical harm to life and health, serious property damage, or severe impact on society, including, but not limited to listed below ("Specific Purpose"). Therefore, you are strongly advised to use Epson products only for the Anticipated Purpose. Should you desire to purchase and use Epson products for Specific Purpose, Epson makes no warranty and disclaims with respect to Epson products, whether express or implied, including without limitation any implied warranty of merchantability or fitness for any Specific Purpose. Please be sure to contact our sales representative in advance, if you desire Epson products for Specific Purpose:
 Space equipment (artificial satellites, rockets, etc.)/ Transportation vehicles and their control equipment (automobiles, aircraft, trains, ships, etc.) / Medical equipment/ Relay equipment to be placed on sea floor/ Power station control equipment / Disaster or crime prevention equipment/Traffic control equipment/ Financial equipment
 Other applications requiring similar levels of reliability as the above
- Epson products listed in this document and our associated technologies shall not be used in any equipment or systems that laws and regulations in Japan or any other countries prohibit to manufacture, use or sell. Furthermore, Epson products and our associated technologies shall not be used for the purposes of military weapons development (e.g. mass destruction weapons), military use, or any other military applications. If exporting Epson products or our associated technologies, please be sure to comply with the Foreign Exchange and Foreign Trade Control Act in Japan, Export Administration Regulations in the U.S.A (EAR) and other export-related laws and regulations in Japan and any other countries and to follow their required procedures.
- Epson assumes no responsibility for any damages (whether direct or indirect) caused by or in relation with your non-compliance with the terms and conditions in this document or for any damages (whether direct or indirect) incurred by any third party that you give, transfer or assign Epson products.
- For more details or other concerns about this document, please contact our sales representative.
